

* Notes for Attached WEF PLUS National Parity Suggestion and Calculation Chart

Globally, the WEF PLUS goal for each regular attendee is an equivalent of USD 10 beyond normal Thanksgiving/Harvest or Faith Promise giving. USD 10 means 10 dollars (\$10). We have attached a chart to help you calculate an equivalent gift in various countries. The chart considers national exchange rates as well as standards of living.

To see how this works, please note Argentina for an example: The exchange rate between US dollars and Argentina pesos on August 16, 2010 was 3.9293 pesos to \$1.

Therefore, \$10 equals 39.293 pesos or rounded to the nearest peso, \$10 equals 40 pesos. However, this calculation alone does not take into account the difference in wages between someone living in Argentina and someone living in the U.S.A..

The average salary of an Argentine is USD \$13,800 as opposed to USD \$46,400 for an average American. Therefore, \$10 has more value to an average Argentine than it has to an average American. Therefore, we made a second calculation we call parity value.

The second calculation yields a parity value of 11.69 pesos. The chart then rounds this to 10 pesos. So, the equivalent goal in Argentina would be approximately 10 pesos.

Please feel free to utilize and/or share this chart. It could be another insightful and motivating mission education resource for your congregation well beyond WEF PLUS!
